Education

Bachelor of Science in Computer Engineering, Georgia State University

Graduated: May 2023

Technical Skills

- Programming: Python, Bash, Groovy
- Cloud Platforms: AWS (EC2, S3, Lambda), Docker, Kubernetes
- Automation: CI/CD pipelines, Jenkins, Terraform
- Databases: MySQL, DynamoDB
- Tools: Git, Linux, Monitoring (Datadog, CloudWatch)

Work Experience

Cloud DevOps Engineer, SecureCom Solutions

August 2023 – Present

- Automated deployment and monitoring of AWS infrastructure using Python and Terraform.
- Maintained and optimized Docker containers for scalable web services.
- Built CI/CD pipelines to streamline integration and deployment processes.
- Collaborated with development teams to troubleshoot system performance issues.
- Conducted code reviews and implemented automation scripts for security and compliance.

Projects

- Migrated data pipelines to AWS cloud for improved reliability.
- Deployed RESTful microservices on Docker and Kubernetes.

Soft Skills

- Strong problem-solving and troubleshooting abilities.
- Experience working in fast-paced, collaborative environments.
